Prior Art Citation

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yamanoi et al. (6,269,058) and Yamada et al. (5,526,332), both discloses an apparatus capable of generating a clock signal including counters and comparator for comparing the counted number.

Reasons For Allowance

The following is an Examiner's Statement of Reasons for Allowance:

The prior art of record alone or in combination does not teach or suggest the apparatus and method for generating a bit clock synchronized with a digital signal having the combination of elements and steps with their recited function and process, along with having the specific function and process of the first and second counters, and the bit clock generating unit: generating the bit clock based on the counted number of the first counter or at a channel bit interval, if the counted number of one of the first edge counter and second edge counter is equal to a first predetermined value, as set forth in claims 1-29; or using one of the channel bit interval and a first count value, wherein the first count value is reset and generated by counting a system clock every time the edges are detected during the first period in the bit clock lock state, as set forth in claims 30-40.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
